

The Comprehensive Solution When Lives Are on the Line.

PROTECT YOURSELF

Quality gear keeps everyone safe in an emergency.

Personal flashlight – To see and signal.

Smoke mask – 20-30 minutes' protection in heavy smoke, longer in light smoke.

Goggles – Protects eyes.

Smoke Block – Spray foam to seal doors and prevent smoke coming in.

Head and hands protection – Safety cap and leather gloves.

Spidescape equips you with the right tools, and prepares you with the know-how to protect and save lives when crisis threatens above the second floor.

Protect yourself and your family in three different ways:

1. Escape safely down stairs.
2. Stay safe in your home, while waiting for help or for emergency to pass.
3. Exit and descend to safety from a window or balcony.

Safe and Simple – The Spidescape system is easy to use, even under duress and in adverse conditions, and is built to keep you safe.

Portable – Your Spidescape gear is organized and protected in a durable, water-tight hard case you store in a closet or under your bed.

Proven and Certified – Spidescape systems used by professionals, and are certified to the highest standards.

Customized – A firefighter will visit to understand your location, situation, and special needs (even pets, if needed) so your kit is personalized for you and your family.

Delivered with Training – Your Spidescape Kit is delivered by a firefighter who will go through the equipment and its proper use, and answer your questions. Plus, get printed instructions and access educational videos.

Supported with Comprehensive Service – The annual service fee entitles you to an array of services and 24/7 support so you and your family are prepared for every emergency, before, during and after.

ALERT RESCUERS

Signal rescuers of your location.

Light strobe – Sets under your door.

Window banner – Hang for external ID.

Whistle – Makes your location known.

SELF RESCUE

Certified gear to get everyone out a window or balcony safely.

Cocoon harness – A simple, wrap-around harness for quick on and off.

Portable anchor – Flexible, strong and versatile - sets up anywhere in seconds.

Controlled descent device – Safe, hands-free, speed-limited, automatic descent.

Fire resistant rope – Durable, custom length.

GET HELP

Ensuring you are fully prepared to take control in any emergency.

Consultation – Spidescape will work with you to customize your gear.

Personal delivery – A local firefighter will deliver your kit and train you to use it.

Annual inspection – A firefighter will visit to inspect, maintain and re-certify your kit.

Registration – Your local fire department will know you have Spidescape.

Emergency call tree – In an emergency, make one call to alert friends and family.

Support – Get help 24/7.
